SUMMARY

Software Engineer with 2+ years of experience in designing and developing scalable, production-grade applications using Python, Django, FastAPI, Flutter, AWS, Docker, PostgreSQL, MongoDB, and Redis. Experienced in microservices, REST APIs, cloud deployment, and AI-powered solutions with a strong focus on performance, reliability, and clean architecture.

TECHNICAL SKILLS

- **Languages**: Python, JavaScript, HTML5, CSS3
- **Frameworks**: Django, Django REST Framework (DRF), FastAPI, React, Bootstrap, Django Channels
- **Databases**: PostgreSQL, MySQL, MongoDB, Redis
- **Cloud & DevOps**: AWS (EC2, S3, RDS, Lambda, EventBridge), Docker, Git, GitHub, GitHub Actions, Linux, Nginx
- **Architecture**: Microservices, REST APIs, JWT, RBA, Cloud-Native Architecture, CI/CD
- **Tools & Services**: Firebase, LiveKit, Customer.io, MSG91, Google Maps API, Weather API, Sentry
- **Payments**: Razorpay, Apple Pay, Google Pay

EXPERIENCE

REVIN KRISHI

07/10/2025 - PRESENT

FULL-STACK DEVELOPER - FULL TIME

LIVO **APP LINK**

Impact: Led the architecture and development of a cloud-native, AI-powered smart agriculture platform, enabling farmers to reduce cultivation costs, improve crop yield, and make data-driven decisions through intelligent recommendations and real-time insights.

Technologies: Python, Django, Django REST Framework, FastAPI, Flutter, PostgreSQL, MongoDB, Redis Cloud, Docker, AWS (EC2, S3, Lambda, EventBridge), LiveKit, Firebase, MSG91, Customer.io, Google Maps API, Weather API, Sentry, Razorpay, Apple Pay, Google Pay.

- Developed a microservices-based platform using Django and FastAPI with secure REST APIs for Flutter, deployed across Development, Staging, and Production environments on AWS.
- Built AI-driven features like Chat & Live Vocie chat also including GDD & fertigation recommendations, crop recommendation, plant disease diagnosis, weather forecasting, climatic alerts, pest & disease alerts, and spray condition analysis.
- Integrated LiveKit, Firebase, Redis Cloud, Weather API, Google Maps, Customer.io, MSG91, Sentry, and payment gateways (Razorpay, Apple Pay, Google Pay) for a scalable production-ready platform.
- Optimized application performance, scalability, and reliability using Docker, PostgreSQL, MongoDB, AWS cloud services, and distributed caching.

IIT PALAKKAD - SATCARD

27/05/2025

FULL-STACK DEVELOPER - FULL TIME

REVIN LOG **APP LINK**

Impact: Enabled farmers and agronomists to calculate precise fertilizer needs using GDD (Growing Degree Days), manage inventory efficiently, and track farm expenses and income for better financial planning.

Technologies: Python, Django, Flutter, MySQL, MongoDB

- Designed and developed a backend fertilizer calculator powered by GDD to optimize crop growth planning.
- Integrated inventory management with fertilizer usage and expense–income tracking, helping users monitor both resources and finances.
- Exposed API endpoints for Flutter mobile integration, ensuring a smooth and responsive user experience.

REVIN ADMIN DASHBOARD **WEB LINK**

Impact: Delivered a centralized platform for admins and employees to manage **IoT** devices, employees, and support tickets with role-based access and real-time insights.

Technologies: Python, Django, React, MySQL, MongoDB

- Built a full-featured Admin Dashboard with permission-based CRUD operations for **IoT** devices, employees, and tickets.
- Developed device monitoring features including data visualization, status tracking, and downloadable reports to support better decision-making.
- Implemented role-specific dashboards for admins and employees, ensuring secure and efficient access.
- Handled both backend (Django) and frontend (React) development for a seamless, responsive experience.

ALKOR CYBER SPACE 23/12/2024 - 23/04/2025

PYTHON DJANGO DEVELOPER - INTERNSHIP

E-LEARNING PLATFORM **GIT LINK** - **WEB LINK**

Impact: Delivered a streamlined, scalable, and secure e-learning solution that improved course accessibility, automated manual processes, and enhanced the overall learning experience.
Technologies: HTML, CSS, JavaScript, Bootstrap, Django, PhonePe, PostgreSQL, Email Automation using Python Redis, Django Channels, and AWS.

MANAGEMENT SYSTEM FOR IMAT GLOBAL & ALKOR CYBER SPACE **GIT LINK**

Impact: Delivered a secure and efficient management platform that streamlined student, employee, and sales data handling while enabling real-time performance monitoring and role-based access.

Technologies: HTML, CSS, JavaScript, Bootstrap, Django, PhonePe, PostgreSQL, Email Automation using Python Redis, Django Channels, and AWS.

CERTIFICATIONS

- **Python Web Development Expert**
  Organization: Luminar Technolab, Cochin
  Date Obtained: June 2024
- **National Council for Technology and Training**
  Organization: Luminar Technolab, Cochin
  Date Obtained: June 2024
